SKILLS

- **Languages:** C, C++, Java, JavaScript, HTML
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Socket.io, REST APIs, Tailwind CSS, Vite
- **Tools/Platforms:** Git, GitHub, GitHub Actions (CI/CD), Docker, n8n, Postman
- **Soft Skills:** Problem Solving, Adaptability, Leadership, Project Management

INTERNSHIP

Full Stack Intern | VANILLAKART | [Certificate](#)

- **Built a doctor appointment booking platform** with features including doctor search, slot selection, and booking confirmation, implementing **concurrency management** to handle simultaneous requests without double-booking.
- **Designed 12+ REST API endpoints** for user registration/login, doctor search, and appointment booking, with comprehensive Postman testing to validate functionality and performance.
- **Debugged** a session management issue where users were logged out on refresh — identified root cause as **improper JWT persistence** and resolved it by **storing tokens in localStorage**.
- **Designed** MongoDB schema for doctors, patients, and appointments — **optimized queries using indexing** for faster lookups.
- Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript (ES6+), JWT, Tailwind CSS

PROJECTS

Quick-Stay Hotel Booking Platform | [GitHub](#)

August 2025 - November 2025

- Developed a **full-stack hotel booking platform with real-time availability search**, reducing unnecessary API calls by ~40% using debounced queries and optimized state handling
- Optimized **REST APIs with MongoDB indexing**, improving response time by ~30% by limiting full collection scans
- Implemented secure **RBAC using Clerk at the API middleware layer**, ensuring strict data isolation and preventing unauthorized access.
- Integrated **Stripe** for payments, **Cloudinary** for image uploads with compression, and **Nodemailer** for booking confirmations — enabling full end-to-end booking flow.
- Tech Stack: React.js, Vite, Node.js, Express.js, MongoDB, Clerk, Stripe, Cloudinary, Nodemailer.

ChatSphere - Real-Time Messaging Platform | [GitHub](#)

March 2026

- Developed a real-time chat application using **MERN stack** and **Socket.io** with **room-based architecture**, enabling low-latency communication (**<200ms latency**)
- Integrated **typing indicators and online/offline presence using Socket.io events**, enabling real-time updates without polling
- Automated **CI/CD pipeline using Docker and GitHub Actions**, reducing deployment effort by ~60%
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Docker, GitHub Actions.

TRAINING

Full Stack MERN Development Training – Lovely Professional University | [Certificate](#) | [Live](#)

June 2025 – July 2025

- Built full-stack **MERN apps** using **React**, **Node.js**, **Express**, and **MongoDB**, implementing **REST APIs** and **JWT auth**.
- Developed a platform allocation system using **interval trees** and **priority queues** for **conflict detection** and scheduling.

CERTIFICATES

- Frontend Developer - React | HackerRank | [Certificate](#) October 2025
- Master Generative AI Tools | Infosys | [Certificate](#) September 2025
- MongoDB Basics for Students | MongoDB | [Certificate](#) October 2025

ACHIEVEMENTS

- **Data Structures & Algorithms Excellence** March 2026
Solved 600+ coding problems across [LeetCode](#), GFG, and HackerRank
- **Multi-Language Coding Proficiency** September 2025
Achieved 5★ in C++, 4★ in C, and 3★ in Java on [HackerRank](#)

EDUCATION

Lovely Professional University

Bachelor of Technology
Computer Science and Engineering; CGPA: 7.54

Punjab, India
Since August 2023

Kendriya Vidyalaya

Intermediate; Percentage: 82%

BHU, Varanasi
April 2021 – March 2022

Kendriya Vidyalaya

Matriculation; Percentage: 83%

BHU, Varanasi
April 2019 – March 2020
