SKILLS

- **Languages:** C, C++, Java, JavaScript (ES6+), HTML
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Socket.io, REST APIs, WebSockets, Tailwind CSS, Vite
- **Tools/Platforms:** Git, GitHub, GitHub Actions (CI/CD), Docker, Postman, MongoDB (Indexing, Query Optimization), JWT, RBAC
- **Soft Skills:** Problem Solving, Adaptability, Leadership, Project Management

INTERNSHIP

Full Stack Intern | VANILLAKART | Certificate

- **Built** a scalable **doctor appointment** platform handling **concurrent bookings** with conflict **prevention logic**
- **Designed 12+ REST API endpoints** for **user registration/login, doctor search, and appointment booking**, with **comprehensive Postman testing to validate functionality and performance**.
- **Debugged** a session management issue where users were logged out on refresh — identified root cause as **improper JWT persistence** and resolved it by **storing tokens in localStorage**.
- **Designed** MongoDB schema for doctors, patients, and appointments — **optimized queries using indexing** for faster lookups.
- Tech Stack: MongoDB, Express.js, React.js, Node.js, JavaScript (ES6+), JWT, Tailwind CSS

PROJECTS

ChatSphere - Real-Time Messaging Platform | GitHub March 2026

- Developed a real-time chat application using **MERN stack** and **Socket.io** with **room-based architecture**, enabling low-latency communication (**<200ms latency**)
- Integrated **typing indicators and online/offline presence using Socket.io events**, enabling real-time updates without polling
- Automated **CI/CD pipeline using Docker and GitHub Actions**, reducing deployment effort by **~60%**
- Designed **event-driven architecture** to efficiently handle concurrent **real-time users**
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Docker, GitHub Actions.

Quick-Stay Hotel Booking Platform | GitHub August 2025 - November 2025

- Developed a full-stack **hotel booking platform** with real-time availability search, reducing **API calls by ~40%** using **debouncing** and **optimized** state management
- Optimized **REST APIs with MongoDB indexing**, improving response time by **~30%** by limiting full collection scans
- Implemented secure **RBAC using Clerk at the API middleware layer**, ensuring strict data isolation and preventing unauthorized access.
- Integrated **Stripe** for payments, **Cloudinary** for image uploads with compression, and **Nodemailer** for booking confirmations — enabling full end-to-end booking flow.
- Tech Stack: React.js, Vite, Node.js, Express.js, MongoDB, Clerk, Stripe, Cloudinary, Nodemailer.

TRAINING

Full Stack MERN Development Training – Lovely Professional University | Certificate | Live June 2025 – July 2025

- Built full-stack **MERN apps** using **React, Node.js, Express**, and **MongoDB**, implementing **REST APIs** and **JWT auth**.
- Applied data structures like **interval trees** and **priority queues** to solve scheduling and conflict detection problems.

CERTIFICATES

- Frontend Developer - React | HackerRank | [Certificate](#) October 2025
- Master Generative AI Tools | Infosys | [Certificate](#) September 2025
- MongoDB Basics for Students| MongoDB | [Certificate](#) October 2025

ACHIEVEMENTS

- **Data Structures & Algorithms Excellence** March 2026
Solved 600+ coding problems across [LeetCode](#), GFG, and HackerRank
- **Multi-Language Coding Proficiency** September 2025
Achieved 5★ in C++, 4★ in C, and 3★ in Java on [HackerRank](#)

EDUCATION

Lovely Professional University Bachelor of Technology Computer Science and Engineering; CGPA: 7.54	Punjab, India Since August 2023
Kendriya Vidyalaya Intermediate; Percentage: 82%	BHU, Varanasi April 2021 – March 2022
Kendriya Vidyalaya Matriculation; Percentage: 83%	BHU, Varanasi April 2019 – March 2020
